REPORT ON FACTORY VISIT AT INDIA CEMENTS, SANKAR NAGAR, THALAIYUTHU, TIRUNELVELI DISTRICT

Date: 07.12.2024

Time: 10.00 am to 1.00pm

Organised by
Institution Innovation Council (IIC 7.0)

On 07.12.2024 (Saturday), to gain an understanding of the manufacturing processes, quality control measures, and operational practices at factory-India Cements, Tirunelveli. The visit aimed to observe their production workflow and learn about their commitment to quality and environmental responsibility. The factory operates with an installed capacity of insert capacity, e.g., X million tonnes per annum]. The factory produces a range of cement types, including Ordinary Portland Cement (OPC), Portland Pozzolana Cement (PPC), and specialized cements for industrial use. Limestone, the primary raw material, is sourced from nearby quarries. Use of conveyor belts ensures efficient transportation of materials. Next involves the following stages: **Crushing and Grinding:** Limestone and other raw materials are crushed and ground to a fine powder. **Clinker Production:** Materials are heated in a rotary kiln to form clinker. **Grinding and Mixing:** The clinker is mixed with additives like gypsum and ground into the final cement product. **Packaging:** Finished cement is packaged using automated systems for retail and bulk distribution. The visit to India Cements provided a comprehensive understanding of the cement manufacturing process and the company's commitment to sustainability and quality. It highlighted the integration of advanced technology and innovative practices to address industry challenges and maintain a competitive edge. Faculty members and students from PG departments(Mathematics,

Physics, Chemistry, Commerce, English and Computer science), have visited the factory.

Total number of beneficiaries by this programme is 50 students and 2 teachers.
